

STEVE SULLIVAN

Beverton, OR • steven.k.sullivan@gmail.com
Wife: Yan Soucie

Graduated from OSU with a BS in Math but basically it was a computer science degree before such a thing existed.

Drafted into the Army during the Vietnam conflict where I operated computers (since I had a degree in computer science).

Worked at Tektronix in Beaverton, first as a computer programmer. Later as a circuit board designer. Then, as an integrated circuit designer, helping make integrated circuit testers and oscilloscopes. Inventor on a couple dozen patents. Generally, I enjoyed my work.

Since retiring I deliver meals-on-wheels one day a week and do Hospice volunteer work part time a couple days a week. I am working on a wildflower identification website, WildflowerSearch.com, which lets people search for plants by location, flowering time, flower shape, color and size. Currently, 2,800 plants are indexed with links to on-line plant descriptions and photographs.

In the last year my wife and I have visited Ape Cave, Hong Kong, Iron Mountain, Jefferson Park, Mt. Rainier, Painted Hills, Saddle Mountain, Smith Rocks, Arches National Park, Capitol Reef, Bryce Canyon, Death Valley and some other places. Boring photos can be viewed at the following web sites:
