Cindi, Cammi and Candi

After high school, took in 1-1/3 years of college, quit to join the Navy for four years with on-the-job training in minesweeping education at the Long Beach Naval Base; a minesweep support ship homeported in southern Japan for two years was my next duty station and my last year with a support base for our minesweepers in Vietnam's Delta area for a year.

Back to college at Chemeketa CC majoring as a Forestry Tech. Between college and the Bureau of Land Management, my wife, Linda and I married at 39 years old in 1983, first and last time. Found a permanent job with the BLM for 31 years and retired in 2003. My wife worked at the Coquille Care Center as a Director and Supervisor of Activities and Social Services and retired in 1991.

We both added more to our resume's with a three year job with the Norway Cemetery, a five acre tract of land just south of Coquille as Caretakers - mowing and weed eating was the main job. It didn't pay much, but the work was quite satisfying keeping it clean and tidy. We quit in 2008 and retired permanently. Woodworking and scenic photography I dabble in occasionally.
